

VENKATESH

Python Developer

+91-9952142302 babuvenkatesh093@gmail.com LinkedIn website Madurai, India

SUMMARY

Python Developer and AI Enthusiast with 2+ years of self-learning experience in developing web applications and solving real-world business problems. Skilled in Python, Django, REST APIs, AI Tools, Prompt Engineering, and Machine Learning fundamentals, with knowledge of secure authentication systems (OAuth2/JWT).

Developed a real-world [Dental Clinic Management System \(DCMS\)](#) to digitize paperwork, manage patient records, and improve clinic workflow efficiency. Passionate about learning new technologies, building AI-powered solutions, and creating innovative products that solve practical challenges.

Quick learner with strong problem-solving skills, adaptability, and continuous learning mindset. Seeking an opportunity as a Fresher Python Developer / AI Engineer to contribute technical skills, creativity, and modern development knowledge in a growth-oriented organization.

INTERNSHIP EXPERIENCE

Python Developer

Sharpenmind Technologies

Sep 2025 - Dec 2025 Madurai, IN

- Developed a real-time driver drowsiness detection system using Python, OpenCV, NumPy, and MediaPipe for safety monitoring applications.
- Implemented facial landmark and eye-point tracking to detect eye closure, blinking patterns, and driver fatigue from live camera frames.
- Built a real-time monitoring system that captured video frames continuously and triggered alerts, notifications, and SOS warnings when the driver's eyes remained closed for more than 5 seconds.
- Designed a GUI-based application to display live detection results and API responses without integrating IoT hardware devices.
- Applied image processing and feature extraction techniques to improve detection accuracy and performance under different lighting conditions.
- Used modular and structured Python programming practices with Git and GitHub for project management, testing, and documentation.

Machine Learning Engineer

Elysium Technologies

Sep 2023 - Dec 2023 Madurai, IN

- Built a strong foundation in Python programming and gained practical experience with machine learning libraries such as NumPy, Pandas, and Matplotlib.
- Implemented basic machine learning models using structured and randomly generated datasets for feature filtering, preprocessing, and analysis.
- Applied data preprocessing techniques including data cleaning, grouping, visualization, and noise reduction to improve model performance.
- Worked with supervised, semi-supervised, and unsupervised learning methods while exploring algorithms such as KNN and SVM.
- Developed class-based Python applications using object-oriented programming concepts, inheritance, reusable functions, and Data Structures & Algorithms (DSA).
- Used PyTest, Git, and GitHub for testing, version control, project management, and maintaining proper project documentation following SDLC practices.

EDUCATION

Master of Computer Applications

Madurai kamaraj University

May 2024 - Apr 2026 Madurai, IN

Bachelor of Information Technology

Sourashtra College of arts and science

May 2021 - Apr 2024 Madurai, IN

SKILLS

Python

Django

Git

Flask

HTML

CSS

JavaScript

Java

Websocket

MySQL

MongoDB

Machine Learning

Linux

Docker

React

GitHub

n8n

REST API

PROJECTS

Dental Clinic Management System

Role: Lead Django Developer

Frontend: HTML5, Tailwind CSS, HTMX

Backend: Django REST API, Websocket, Python 3.8, PostgreSQL

Testing: pytest, Selenium

Drowsiness Detection

Role: Python Developer

Backend: Python 3.8, OpenCV, TensorFlow

Frontend: custom tkinter GUI

Weather Forecasting

Role: Data Analyst

Frontend: Flask , FastAPI

Backend: KNN, pandas , scikit-learn ,matplotlib

Testing: pytest, scikit-learn

Web Scraping(Google lens)

Frontend: Flask , BeautifulSoup

Backend: Python 3.8, Scrapy
